

PARSHVANATH CHARITABLE TRUST'S

A. P. SHAH INSTITUTE OF TECHNOLOGY

Department of Information Technology

(NBA Accredited)

Semester: VII

Academic Year: 2026-27

Class / Branch: BE IT-B

Subject: Recent Open Source Lab

Name of Instructor: Prof. Jayshree Jha

Name of Student: Rinkal R Mishra

Student ID: 23104085

EXPERIMENT NO. 02

Aim: To study and understand the use of GPL to contribute to opensource projects.

Open Source

OSS acronym for Open source software is software and its code is available to anyone who can use this software for free and can also modify their code. A code for a particular software is stored in repositories under various licenses. A few famous licenses are:

1. MIT license
2. Apache license 2.0
3. GPL license
4. BSD license

How to Get Started with Open Source?

- Understand why you want to get into open source
- Choosing the best software and version control technology
- Choosing where to contribute (finding orgs to contribute)
- Understanding Codebase
- Finding Issues
- Making your first PR

setting up git commands

Want to contribute to this project? Follow these simple steps:

- 1. Fork the Repository**
Click the Fork button at the top right of this page to create a copy of this repository under your GitHub account.
- 2. Clone Your Fork**
Open your terminal and run the following command (replace RinkalMishra03 with your username if you are someone else forking this):

```
git clone [https://github.com/RinkalMishra03/demogit20250718.git](https://github.com/RinkalMishra03/demogit20250718.git)
cd demogit20250718

git checkout -b add-your-name
```

Conclusion:

In this experiment, we explored the fundamentals of Open Source Software (OSS) and the structured pathway to contributing, highlighting how copyleft licenses like the GPL (General Public License) preserve software freedom by ensuring that derivative works remain open and accessible to all. By understanding key licensing models—ranging from permissive options like MIT to protective ones like GPL—and mastering the practical contribution pipeline from version control to submitting a pull request, we gain the essential technical and legal foundation required to effectively collaborate, respect intellectual property, and meaningfully sustain the global open-source ecosystem.
